Team Lead

ROYAL BANK OF SCOTLAND IDC-Chennai, Tamil Nadu

2010 to 2013

Planned and managed resources (30-member team), leading and guiding the work to successfully deliver IT development projects, including 24x7 solutions and off-shore initiatives. Served as liaison between business and technical aspects of projects. Set project stages and assessed business implications for each stage. Monitored progress to assure deadlines, standards, and cost targets are met. Provided key

support for ETL architecture, preparing diagrams, identifying major streams (Data Conversion, Historical Data Retention Archival, Data Quality, Reconciliation and Data Profiling) and signing off the designs.

- Project Management: Conceptualized, developed and integrated Business Intelligence reporting projects (OBIEE, SAS 9.3), coordinating 30 specialists over 24-month long initiative; project value \$5M, with key benefit to centralize Risk,

Finance, and Treasury data from multiple disparate data sources onto a single platform, enabling standardization of data across customer-target applications.

- Efficiency & Quality Improvements: Provided High Level ETL architecture. Managed release of data warehouse and business intelligence applications in one repository to meet BASEL II risk management requirements. Designed and developed new wireless infrastructures and all peripheral processes.

Project Lead

FRANKLIN TEMPLETON INTERNATIONAL SERVICES-Chennai, Tamil Nadu

2003 to 2010

Management Lead: Lead team of developers in re-factoring online banking application's offshore-migrated code that does not meet the performance or functional objectives of the project. Specified consulting profiles and managed the recruitment process to establish a data management practice in various projects.

- Architect: Architect in providing an innovative loading process for external data that was utilized by legacy systems, UNIX

Shell Scripting, Oracle External Tables, and PL/SQL. Defined the solution for a complex data migration and quality improvement component of a large business change program for a large Mutual Fund company. Conceptual/Logical/Physical database modeling in ORM/ER/UML.

Senior Consultant

SAKSOFT LTD-Chennai, Tamil Nadu

2001 to 2003

Database developer developed accounting systems and sales systems.
