

JEAN LECANTE

Trinity, FL

-Email me on Indeed: <http://www.indeed.com/r/JEAN-LECANTE/db4fa42b300f4c2d>

Professional Summary

Jean Lecante is a Technology Leader specializing in cloud architecture and software development, offering a strong background in technical leadership and solution delivery. With a proven track record in large-scale software development and technology leadership roles, adept at driving innovation and creating seamless integrations with a deep understanding of Domain Driven Design and API-first methodology. Excited about leveraging his expertise in architecture and software delivery to align with the company's mission of simplifying complexity, align with strategic goals and drive exceptional business value.

Work Experience

Senior Principal Engineering Technologist - CTO's Office

Dell Technologies-Tampa, FL

May 2022 to February 2024

- Managed and led research & development initiatives and explored innovative AI powered applications resulting in learning new industry trends and emerging technologies. Env: Machine Learning, Regression, Scikit Learn, Scipy, Python.
- Managed and led development of an OAuth-based cloud security server using C#, Node.js, NestJS, JavaScript / TypeScript enhancing and securing a customer experience platform.
- Managed and led development of a Data Mesh data architecture leveraging DDD, event-driven microservices, and service engineering principles. This IaaS facilitates the delivery of data products for Dell's next-gen Enterprise Data Platform, enhancing its capabilities.

Senior Principal Engineering Technologist - CTO's Office

DELL TECHNOLOGIES-Tampa, FL

- Led R&D initiatives, and explored innovative AI-powered applications resulting in learning and sharing new industry trends and emerging technologies with team.
- Developed an OAuth-based cloud security server using C#, Node.js, NestJS, JavaScript / TypeScript enhancing and securing a customer experience platform.
- Developed KPI plan, collaborating with domain team, to identify metrics, establish measurement methods, and define benchmarks, resulting in a comprehensive framework for tracking performance and enabling continuous improvement.
- Developed a Data Mesh Architecture using domain-driven design, and event-driven microservices, building an IaaS to deliver data products enhancing Dell's next-gen Enterprise Data Platform.

Senior Cloud Application Modernization Architect

IBM CONSULTING-Tampa, FL

- Cloud Transformation thought leader, Advised organizations on their Digital Transformation journey, through the use of cloud technology, resulting in a 15 to 20% increase in competitive advantage.
- Led Cloud-Native development for a US bank, providing agile management, Solution Architecture, API specifications, and Microservice Architecture. The project was successfully delivered 10 days ahead of schedule.
- Showcased multi-cloud Solution Architecture for a major US bank using AWS,

Oracle Cloud, and IBM Cloud, winning the RFP awarding a \$\$ million project.

- Directed technical proposal for an ERP by developing Cloud architecture, sizing, and project plan resulting in a successful SAP HANA Solution Architecture on AWS.

Senior Solution Architect Cloud

CAPGEMINI NORTH AMERICA-Tampa, FL

- Led Digital Transformation projects bringing expertise and leadership in Solution Architecture, Strategy, Cloud Computing, and Microservice Architecture.
- Managed Development Teams as Solution Architect, for an Energy provider, Architecture review, project estimates, scrum ceremonies, and reporting, keeping projects on target and successfully delivering a suite of 12 business apps.
- Converted applications to Cloud-Native, by architecting scalable and available apps, RESTful APIs, delivering the migration project with 100% client satisfaction.

Associate Director

COGNIZANT TECHNOLOGY SOLUTIONS-Tampa, FL

- Expert in digital transformation, Cloud Migration, and Hybrid integration. Led cloud product architecture and development with expertise in solution architecture.
- Led a call center application portfolio migration, implemented Azure AD SSO, and transformed applications into cloud-native solutions, designed a CI/CD pipeline. Delivered scalable platform supporting call center at pick time.
- Led cloud migration projects, designed To-Be Architectures, and AWS Services, directed onshore and offshore teams, resulting in project successful delivery.
- Developed solution architecture for next-generation supply chain management SaaS platform, and authored a white paper contrasting public and private cloud enabling key strategic decisions.

Associate Consulting Partner

WIPRO TECHNOLOGIES-Tampa, FL

- Thought Leader in the enterprise architecture practice, pre-sales, and delivery, expert in SOA, EAI, and BPM for Latin American banking, and financial services.
- Spearheaded strategic IT initiatives to ensure operational efficiency and alignment with corporate objectives.
- Led 30 offshore and 20 on-site team, comprising engineers, developers, architects, and subject-matter experts.
- Pioneered Wipro's LATAM Center of Excellence in Mexico and established an agile Software Factory.
- DISH Network: led the implementation of microservices architecture and Big Data solutions, DevOps, overseeing a team, driving automation, and implementing a transformation roadmap for critical business application portfolio.
- ETB Optimized OSS Information Systems for reliability and established robust support model.
- Citi: Managed delivery across LATAM, implementing middleware solutions for seamless global transaction processing and enhancing IT security architecture.

Enterprise Architect

EXPRESS SCRIPTS-St. Louis, MO

- Developed Enterprise Integration Strategy during the merger and acquisition of two heavyweights in the pharmacy benefits management arena
- Wrote study detailing various integration architecture scenarios with pros and cons, provided set of rationales and criteria to support decision-making, handled sensitive information
- Provided resulting roadmap. Context: SOA, ESB, Mule, IBM DataPower

Enterprise Architect

MARRIOTT VACATION CLUB INTERNATIONAL-Orlando, FL

- Led a team of Solution Architects and Developers to drive SOA adoption efforts at MVCI and Organized the Enterprise Architecture Review Board
- Provided solution and high level design
- Project Reporting and Stakeholder Management
- Led major initiative for implementing an Enterprise Service Bus, developed product roadmap

Enterprise Architect

TODO1 SERVICES INC-Miami, FL

- IT transformation leader for Colombian Fintech played a pivotal role in developing a new Product Strategy and fostering stakeholder engagement for the organization's evolution.
- Reorganized IT into a dynamic, modular infrastructure aligned with business objectives, shifting from development-centric to product Management-centric.
- Spearheaded product development strategy and technology roadmap adoption.
- Pioneered the technology roadmap and initiated the Enterprise Architecture practice at TODO1.
- Unleashed agility in delivery, introducing agile SDLC and software engineering best practices, reducing development time by 25%.
- Led negotiations on business partnership with Clear2Pay.
- Led team of 20 implementing FUSE ESB as an operational backbone for SOA infrastructure, ensuring business value, disaster recovery, and critical application support.

Senior Manager

RCG INFORMATION TECHNOLOGY-Orlando, FL

- Managed multiple project Teams through effective program management for the Florida region, increasing project margin by 15%.
- Managed portfolios of 5 projects and ensured quality assurance for the Dev organization.
- Improved UX testing efficiency for all Disney entertainment consortium front-ends, introducing new tools and processes, resulting in increased client satisfaction.
- Led Application design and development for Starwood's digital platforms including issue management and product release.
- Managed a pool of 20 resources from an offshore center in the Philippines for various projects providing more competitive pricing.
- Provided technical expertise, organized troubleshooting, and improved customer support effectiveness.

Education

Master's Degree in Computer Science

University of Saint-Étienne - Saint-Étienne (42)

Bachelor's Degree in Computer Science

University of Bordeaux I - France

Skills

- Technical Leadership

Proven track record of providing Team Leadership and expertise in delivering solution architecture

across industries.
Technology Vision

Brings a wealth of knowledge to Cloud-based organizations with Technology Strategy and Vision. Seasoned Software Architect.
Software Architecture

Developed platform architecture and Cloud-Native Applications. Developed Software Architecture, adept at using Design Patterns.
Solution Delivery

Led delivery for large-scale infrastructure integration projects. Managed multicultural teams for domestic and Latin American banking and financial services.
